Happiness by GDP per Capita

The scatterplot shows the relationship between happiness score and GDP per capita where each data point represents a country that is color coded by region. There appears to be a positive relationship between these two metrics. For example, in Western Europe there are countries with higher GDP per capita than others and also have higher happiness scores. At a region level, there is the similar relationship when comparing region to region.

Happiness Score

Region
- Australia and New Zealand
- Central and Eastern Europe
- Eastern Asia
- Latin America and Caribbean
- Middle East and Northern Africa
- North America
- Southeastern Asia
- Southern Asia
- Sub−Saharan Africa
- Western Europe

GDP Per Capita
